

## Changes to your policy

An overview of the important changes to your healthcare Insurance at this renewal.

### The main change(s)

We constantly review our plans and often make changes to update or clarify the cover for our customers.

Here are the important change(s) we've made this year – please read this document alongside your handbook. You might see other changes in the handbook, but these don't affect your cover.

#### Overall limit increase

Putting our customers' needs first is our priority and we continue to review our benefits and overall policy limits with your health and well-being in mind. So that we know you have a good level of protection, we've increased the Overall Policy Limit from £100,000 to £250,000 on our Foundation plans.

#### Out of network providers

For treatment in the UK you have access to a network of providers to use for your treatment. We're introducing a new benefit so you can now receive treatment from out-of-network providers in the UK, providing you with more freedom and choice for your treatment. If you do choose a provider outside of our network, any costs above our schedule of procedures and fees will be your responsibility to pay.
